

Dear Ladies and Gentlemen,

VIST COMPOSITE LLC and STEVIK SAS companies participate in the eleventh international specialized exhibition **Composite-Expo 2018** (composite materials, technologies of composites production, equipment, composite products), which will take place in Moscow at Expocentre Fairgrounds **from February 27th to March 1st, 2018**.

We would like to invite you to visit our F01 booth, pavilion 8.1!

Our exhibition program this year includes:

Presentation of **8 new products** in range of **sealant tapes from room temperature till 427°C**;

8 new vacuum and release films to cover wider range of applications, for example to work phenolic resins;

new economical **vac-valves and quick connectors**;

14 new peel plies in our range, for example with adhesive coating, economical polyester peel ply and others;

3 new release agents with one step application and quick dry;

8 new products in category **materials for resin infusion**: new meshes, connectors, clamps.

Demonstrations of the **new generation** manual device for **ultrasonic cutting** operation for precutting of dry reinforcing material and prepregs;

Demonstrations of VIRTEK's **laser projection system in operation**, clarity, accuracy and quality of the projected image, operating comfort of the projection system control menu.

Best wishes,
STEVIK and VIST COMPOSITE Team
