

Cergy, June 19, 2017

Dear Ladies and Gentlemen,

VIST COMPOSITE LLC and STEVIK SAS companies participate in the XIII international aviation and space salon MAKS 2017, which will take place in Zhukovsky, Moscow area, from **July 18 to 23, 2017.**

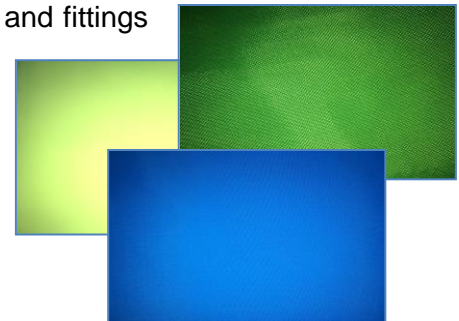

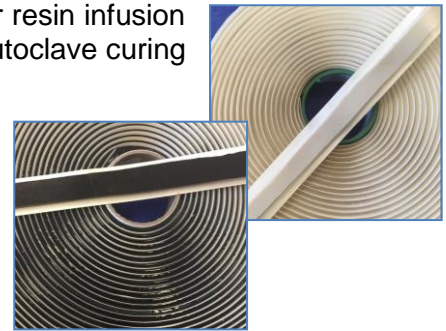

We would like to invite you to visit our booth B4 Hall F3.

Our exhibition program for this year includes :

- Daily life demonstrations at 11 :00 and 15 :00 of vacuum bagging for resin infusion with the use of our unique mobile vacuum system SK1MOVAC and autoclave curing with the use of innovative materials such as:

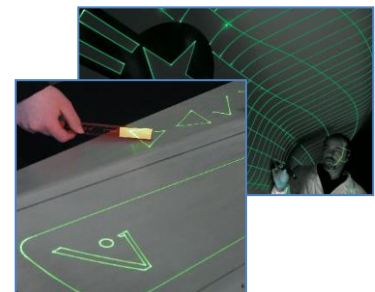

- new range of economical sealant tapes for 120°C / 150°C / 180°C / 210°C;
- new range of peel plies with and without silicone coating, including bright colours (green, yellow, blue) to improve visual control of eliminating of peel ply after curing;
- new products for resin infusion : meshes, valves, resin inlets and fittings for feeding lines;
- new range of vacuum lines for ovens and autoclaves: range of economical valves and quick couplings, quantitative vacuum leak detector and many others.

- Demonstrations of VIRTEK's laser projection system operation, clarity, accuracy and quality of the projected image, projection of the icon menu on the mould.

- Moulds and master-models preparation (cleaning, sealing) and use of different innovative release systems manufactured by MÜNCH CHEMIE.

- Consultations and representation of the new industrial production equipment.

Best wishes,

STEVIK SAS and VIST COMPOSITE LLC Team
